PROFESSIONAL SUMMARY

Senior Backend Developer and Technical Lead with 8.5+ years of experience designing scalable microservices, event-driven systems, and serverless APIs using Node.js, NestJS, and AWS. Strong background in PostgreSQL, MongoDB, Redis, Kafka, and TypeScript, with proven delivery across fintech, payments, logistics, e-commerce, telecom, and real estate domains. Leading engineering teams and driving adoption of AI-assisted development workflows to accelerate delivery, alongside hands-on personal work in AI/RAG pipelines and embedded hardware. Passionate about clean architecture, system design, mentoring, and shipping reliable, high-throughput backend systems.

CORE SKILLS

Languages & Frameworks: Node.js, NestJS, Express.js, JavaScript, TypeScript, Angular

APIs & Architecture: REST, GraphQL, Microservices, Event-Driven Architecture, Kafka, System Design

Databases: PostgreSQL, MongoDB, Redis, MySQL, DynamoDB

Cloud & DevOps: AWS (Lambda, API Gateway, S3, SNS, Step Functions), Docker, CI/CD, Serverless Framework

Reliability & Tooling: Observability (Sentry), Git, Mocha, Chai, Swagger, Postman, SOLID Principles, Design Patterns, Agile

AI Development Tools: GitHub Copilot, Cursor, AI-Assisted Code Review & Documentation

AI / ML (Self-Learning, In Progress): Exploring RAG pipelines, LLM integration, and embedded/hardware prototyping through personal projects

Leadership: Technical Leadership, Team Mentoring, AI-Assisted Development Workflows, Code Review Standards, Architecture Ownership

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Dec 2021 – Jul 2025

Brainvire Infotech Inc. (Remote) | Remote

- Developed 12+ microservices using NestJS and PostgreSQL for fintech and real estate clients.
- Migrated services to AWS Lambda and Step Functions, cutting deployment time by 40%.
- Built backend services and automation features for EbixCash, a large-scale Indian fintech and digital payments platform (UPI, wallet, bill payments, remittances).
- Delivered backend enhancements and process automation for GMS Worldwide, a pan-India logistics and courier platform, improving shipment tracking and warehousing workflows.
- Mentored junior developers, reviewed PRs, and improved backend delivery timelines.

Technical Lead

Jul 2025 – Present

Ekfrazo Technologies Private Limited (Remote) | Remote

- Continued ownership of key fintech and logistics client platforms, driving further backend automation, new feature development, and performance improvements.
- Introduced AI-assisted development workflows using tools like GitHub Copilot and Cursor across the engineering team, accelerating feature delivery and reducing repetitive development effort.
- Defined technical architecture and design standards for backend systems, ensuring scalability, maintainability, and consistency across projects.
- Led and mentored a team of developers, setting coding guidelines, conducting design/code reviews, and raising overall engineering quality.
- Owned technical planning and delivery timelines, working directly with stakeholders to translate requirements into system architecture.
- Drove adoption of AI-augmented testing and debugging practices to shorten release cycles and reduce production issues.

Backend DeveloperJun 2020 – Dec 2021

Hippo Innovations Pvt. Ltd. (Remote) | Remote

- Built 20+ REST APIs for a multi-tenant e-commerce platform.
- Reduced DB query latency by 30% through indexing and schema optimization.
- Integrated backend with frontend and implemented Docker-based CI/CD.

Software DeveloperSep 2019 – May 2020

Prolitus Technologies Pvt. Ltd. | Noida

- Developed modules for crypto payments using Angular and Node.js.
- Boosted app speed and test coverage with caching and unit tests.

Junior DeveloperJan 2018 – Sep 2019

Mind In Motion Pvt. Ltd. | Gurugram

- Delivered full-stack SaaS features in Angular and Node.js.
- Reduced bug rate by 50% through better testing and production logging.

PROJECTS – CLIENT-OWNED

EbixCash – Fintech & Digital Payments Platform (ebixcash.com)

- Contributing to backend services for one of India's largest fintech platforms, spanning digital wallet, UPI payments, money transfer, and bill payment/recharge services.
- Working within a high-scale financial technology stack supporting a nationwide network of physical and digital distribution channels.

GMS Worldwide – Logistics & Courier Automation (gmsworldwide.com)

- Building backend automation and feature upgrades for a pan-India courier, cargo, and warehousing platform with 100+ branch offices and 1,200+ franchise partners.
- Improving shipment tracking, delivery workflows, and operational efficiency through new automation features.

Call48 – Telecom SaaS

- Developed backend for DID and PBX systems in Node.js and PostgreSQL.
- Improved transaction throughput by 3x and reduced processing latency by 40%.

Secpay – Crypto Payments Platform

- Built AWS-based secure plugin APIs using Lambda, DynamoDB, and Step Functions.
- Achieved 90%+ test coverage and enforced TRISA compliance.

Blush Now – Beauty Platform

- Created booking and loyalty modules; integrated Sentry for improved observability.

Rasep – Supply Chain Management

- Built order tracking with NestJS, Hasura, PostgreSQL, and event triggers.

Twest – Crypto Finance System

- Designed real-time asset tracking and optimized SQL performance.

Hamptons – Real Estate Scraper

- Built scalable scraper for US listings using Node.js and MongoDB.

StoreHippo – E-commerce Engine

- Developed APIs for 500+ e-commerce storefronts.
- Delivered discount engine increasing sales by 35%.

Virtuse – Crypto Wallet

- Built core crypto exchange and wallet sync system with MySQL and AngularJS.

ExtraHand – Job Board App

- Delivered micro-task job backend using Redis and MongoDB.

Charity Ransom – Crowdfunding Platform

- Created donation campaign workflows with Node.js, MongoDB, and AWS.

PROJECTS – PERSONAL / OPEN SOURCE

AI Rover – Autonomous RC Rover (In Progress)

- Designing and building an RC car-based rover end-to-end, covering both hardware (chassis, sensors, control electronics) and software, working toward a fully autonomous AI-driven rover.
- Building AI/RAG (Retrieval-Augmented Generation) pipelines to power the rover's onboard decision-making and contextual intelligence.

WhatsApp Lead Tool – Lead Capture & Analytics

- Built lead system using Node.js, Kafka, Hasura, GraphQL, PostgreSQL, Docker.
- Features include form-based capture, tagging, DLQ retry, CSV export, and analytics.

Invoice Generator for Freelancers – SaaS App

- Developed GST-compliant invoice tool using Node.js, React, MongoDB.
- Hosted on Firebase with support for recurring clients and PDF export.

Hisaab Kitaab – Expense Tracker

- Built expense tracker with category filters and monthly analytics dashboard.

node-decorator-lite – Open Source Utility

- Lightweight decorator support for Node.js to mimic NestJS-style coding.
- Improves route and middleware composition in clean architecture projects.

ai-powered-ids – AI/ML Image Similarity POC

- Built initial prototype for comparing images using ML techniques in Node.js and Python.

natural – NLP Toolkit (Contributor)

- Contributed to open source NLP library including documentation and fixes.

EDUCATION

B.Tech – Applied Electronics & Instrumentation

College of Engineering, Roorkee | 2013 – 2016 | 64.9%

Higher Secondary – PCM

Jawahar Navodaya Vidyalaya, Nainital | 2010 – 2011 | 72.8%

Secondary School – CBSE

Jawahar Navodaya Vidyalaya, Nainital | 2008 – 2009 | 84.8%
